

## **2002-2003 Neuroscience Seminar Series**

- Oct 23            Leonard Kaczmarek  
Yale School of Medicine  
“Protein Kinases and Neuronal Excitability”
- Nov 13            Morris Moscovitch  
University of Toronto  
“Remote Memory Consolidation and Hippocampus-  
Neocortical Interaction: Evidence from the Lab and Clinic”
- Dec 11            Jeffrey Mogil  
McGill University  
“Genetic Mediation of Pain and Pain Inhibition: From Mice to  
Molecules”
- Jan 8              Ravi Menon  
University of Western Ontario  
“Bridging Brain and Behaviour: fMRI Studies of the Visuo-  
motor System”
- Feb 12            Michael Strong  
University of Western Ontario  
“Amyotrophic Lateral Sclerosis: A Multi-systems Disease”
- Mar 12            Alan Kingstone  
University of British Columbia  
“Here’s looking at you (and elsewhere): Do the eyes really  
have it?”
- Mar 26            Atsushi Iriki  
Tokyo Medical and Dental University  
“Cortical Mechanisms Subserving Formation and  
Modification of Body Centred Coordinates”
- Apr 9              David Sheinberg  
Brown University  
“Learning to see a complex world: Evidence from physiology  
and psychophysics”
