

2003-2004 Neuroscience Seminar Series

- Nov 19 Xiaoquin Wang
John Hopkins University School of Medicine
“Neural processing of complex sounds in the auditory cortex
of non-human primates”
- Dec 10 Allison Doupe
University of California San Francisco
“The neural basis of vocal learning in songbirds”
- Jan 21 Yves De Koninck
Universite Laval Robert-Giffard
“Inversion of inhibition as a novel mechanism of
neuropathology”
- Feb 11 Richard Born
Harvard University
“The integrative action of the visual system”
- Mar 10 Sergei Kirov
Medical College of Georgia
“Plastic phenotypes of developing and mature hippocampal
spines”
- Mar 24 Ru-Rong Ji
Harvard Medical School
“Molecular mechanisms of pathological pain with special
reference to MAPK”
- Mar 26 Luc Pellerin
University of Luasanne, Switzerland
“Neuroenergetics: Calling upon astrocytes to satisfy hungry
neurons”
- Apr 19 Richard Brown
Dalhousie University
“A tribute to Donald O. Hebb”
