

**Centre for Neuroscience Studies
Seminar Series**

2008-09

Sept 17 2008	Carol Colby University of Pittsburgh	Active Vision
Oct 8 2008	Ian Cameron Queen's University	Response Switching and the Basal Ganglia
Oct 22 2008	Paul Clark McGill University	Nicotine, a drug with suspected relevance to cigarette smoking
Dec 4 2008	Stephen Lisberg University of California San Francisco	From cerebellar complex spikes to motor learning in smooth pursuit eye movements
Dec 17 2008	Julien Doyon University of Montreal	Brain plasticity associated with learning and consolidation
Jan 14 2009	Brian Corneil University of Western Ontario	Neck muscle recruitment during oculomotor tasks: What are "high-level" signals doing on a "low-level" motor effector?
Feb 3 2009	Jeremy Semans University of British Columbia	Dopamine modulation of prefrontal cortex neurons and networks
Feb 10 2009	Rob Brownstone Dalhousie University	
Mar 11 2009	Greg DeAngelis Rochester University	Multisensory integration for self-motion perception
Apr 8 2009	Michael Frank University of Arizona	Interactive dynamics of corticostriatal circuits in reinforcement learning and decision making
