

## CNS Seminar Series - 2012/13

---

Date	Speaker	Affiliation	Seminar Title	Special Location
August 20th, 2012	Andrew Pruszynski, PhD	Department of Integrative Medical Biology, University of Umea, Umea, Sweden	Sophisticated Processing of Tactile Information in the Skin	
September 19th, 2012	DJ Cook	Resident Neurosurgery, University of Toronto	Climbing the STAIR - way to translation: renewed optimism for stroke neuroprotection?	
November 14th, 2012	Keith Schneider	Associate Professor, Dept. of Biology & Centre for Vision Research, York University	Imaging the human subcortical visual nuclei in normal and clinical populations	
November 28th, 2012	Laurent Bouyer	Department of Rehabilitation Faculty of Medicine, Universite Laval	Walking in an altered force environment: a way to study adaptive plasticity in humans	
February 6th, 2013	Mark Churchland	Assistant Professor, Neuroscience, Columbia University, New York	The neural dynamics of movement generation	
February 13th, 2013	Timothy H. Murphy	Professor, Graduate Program in Neuroscience, University of British Columbia	Imaging and Optogenetic Tools for Elucidating Cortical Circuit Function Following Stroke	
February 27th, 2013	Robert Sainburg	Kinesiology and Neurology, Pennsylvania State University	The Translational Neuroscience of Brain Lateralization	
April 3rd, 2013	Tod E. Kippin	Associate Professor, Psychology, University of California, Santa Barbara	Sex Differences in Animal Models of Drug Abuse	
May 8th, 2013	Heinrich E Lob, Ph.D.	Research Scientist, Cornell University, College of Veterinary Medicine, Department of Biomedical Sciences	The Role of Central Neural ROS in Blood Pressure Regulation and Energy Homeostasis
